Web Developer · Telegram Bots · iOS

Vladivostok, Russia · 24 years old

ABOUT

I build websites, Telegram bots, Mini Apps and iOS apps end to end, from design, layout and backend to payments, server, domain and SSL. I take projects all the way to launch and support them afterwards. I focus on speed (99/100 on Google Lighthouse for mobile) and on how things work on a phone.

EXPERIENCE

Freelance developer

2026 — present

More Hleba — bakery online store

Catalog with nutrition facts, cart, phone-call login, customer account, YooKassa payments and an order CRM. I raised its Lighthouse score from 60 to 99.

VMR TRANS — investor presentation

16 fullscreen video slides with lazy-loaded video, mobile layout and hosting setup.

GREYMAX — Telegram bot & Mini App

Subscription sales with automatic access delivery, YooKassa and SBP payments and admin tools. Built with Python (aiogram), SQLite and Docker on a VPS running 24/7.

CalorieAI — iOS app

A SwiftUI nutrition tracker with a food diary, calorie and macro counting, hybrid food search through my own API proxy, and reports.

EDUCATION

Vladivostok State University (VVSU)

2024 — present

Department of Information Technologies and Systems, Bachelor's program

VVSU College, Artyom

2020 — 2024

Programming in Computer Systems (09.02.03)
